## *Flec Sport Rolls*

Flec Sport Rolls offer superior durability, are suitable for both interior and exterior applications and are ideal for surfacing areas that require resilience, sound absorption, spike resistance and traction.

The 100% recycled rubber rolls are specially designed and manufactured for durability. They also serve as an effective buffer against acoustical vibration.

"If flooring does not sound like the most exciting topic, consider this: no single aspect of your facility has a greater impact on safety, liability, or perception of quality than your choice of flooring. In fact, the right flooring will have a positive effect on user performance and retention, as well as put money in your pocket over the long haul. The days of thick carpet and padding are over."

- From "Floored!" By Bryan Green  
 Article featured in *On-Site Fitness*, July / August 1999

## **Colors**

Flec Sport Rolls are available in a variety of colors or completely black. The colored particles are homogeneously mixed throughout the entire product in a uniform 17% mixture and have no chance of wearing away. The vibrant colors are perfect for dramatic interior solutions and exterior accents.

### **Standard colors are:**

Black, Blue, Blue/Grey, Green, Red, Grey and Yellow.

## **Applications**

- |                     |                           |
